

National Laboratories R&D Panel:
**Research Activities at
Naval Nuclear Laboratory**

Eric Clementoni
Advisor Engineer

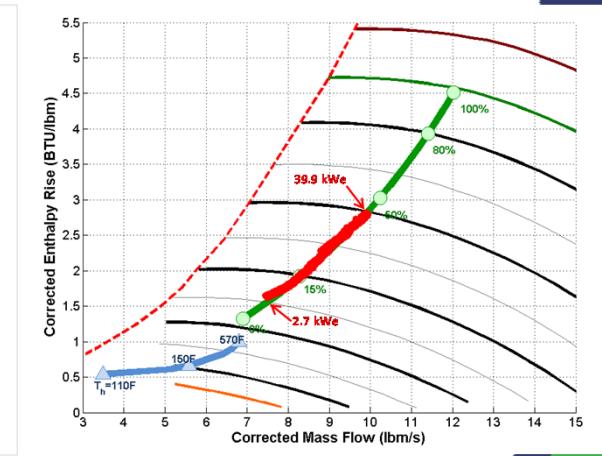

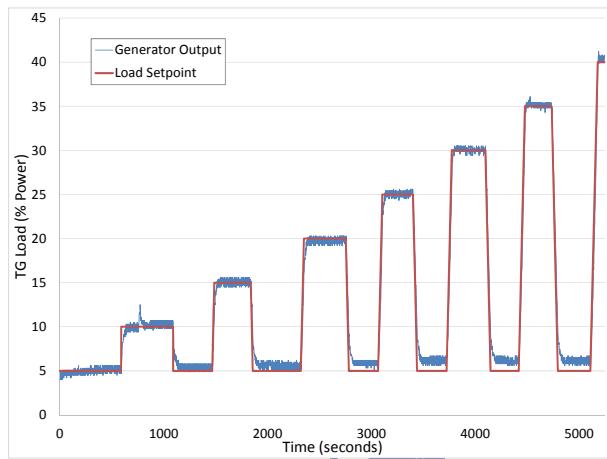

The Naval Nuclear Laboratory is operated for the U.S. Department of Energy by Bechtel Marine Propulsion Corporation,
a wholly owned subsidiary of Bechtel National, Inc.

Development Focus

- sCO₂ Brayton system development efforts focused on:
 - System thermodynamics
 - System control modeling
 - IST operation to confirm system control and validate transient modeling
 - Component development

100 kWe Integrated System Test

Primary Objectives

- ✓ Demonstrate system controllability and feasibility
- ✓ Provide test data to verify the ability to model sCO₂ Brayton system
- ✓ Provide sCO₂ loop operating experience and design feedback

Comparison of Compressor Performance to Map Predictions
